Requirements*	the solution	
_	Online presence	Enable small businesses to set up an online platform where
		customers can browse services and products.
	2. Increase in revenue	Online booking and the convenience of easy payments attract more customers. Moreover, the app can offer promotions (free shipping, referral programs, special packages for new members, coupons), discounts (birthday discounts, seasonal discounts, time-limited discounts, senior/student discounts, clearance sales), or loyalty programs (rewards programs, cashback program, exclusive membership) for its users to increase sales.
	3. 24/7 real-time availability	The application will allow customers to book services or place orders anytime, anywhere, ensuring small businesses do not miss opportunities due to limited availability.
	4. Payment integration	Allow small businesses to accept payments through the appusing secure payment gateways.
	5. Data-driven decision making	The admin dashboard will provide insights (customer info and preferences, bestsellers, customer feedback and reviews) into the most popular services or products and the best booking items. This data helps small businesses make strategic decisions.
	6. Flexible controls by admins	Small businesses can easily update their services, modify bookings or availability, and send notifications (welcome emails, newsletters, payment notifications, ordering/booking notifications, info about promotions, sales, and discounts, surveys) to customers. This enables businesses to respond quickly to customer needs.
Key Deliverables to	to Define the boundaries of work that you expect to receive from the students effort (vs. in	
be produced by students*	1. Front-end	Building the user interface, including registration, product
Students	development	catalogue, and booking system.
	Back-end development	Setting up the server and database.
	3. Payment integration	Implementing a secure payment system.
	4. Admin dashboard	Developing an admin interface that allows small business owners to manage customers, appointments, and orders.
	5. Documentation	Creating project documentation (user manuals and installation guidelines, documents about system structure, developer's statement) including system architecture, user manuals, and installation guides.
